## Social Protection for Industrial Workers How to Move Forward?

#### Dr Khondaler Golam Moazzem,

Research Director, CPD

14 March 2022

#### Content

- 1. Introduction
- 2. Workers' Social Protection: Different Areas
- 3. Social Protection for Working Age People in Bangladesh
- 4. Future Context of Social Protection of Working Age People
- 5. Social Protection for Working Age and Old Age People

## I. Introduction

#### I. Introduction

- Social protection provides by a society to individuals and households to ensure their access to health care and to guarantee income security
  - This is particularly happened in cases of old age, unemployment, sickness, invalidity, work injury, maternity or loss of a breadwinner
- Social protection related activities have been undertaken in Bangladesh under various social safety net programmes following the 'life cycle approach'
  - Child and family social protection schemes
  - Social protection for women and men of working age
  - Social protection for older women and men: pensions and non-health benefits
- Safetynet programmes are yet to cover all areas of social protection
  - Highest proportion of people covered under old age (39% of total old age people) followed by children (29.4%), mothers with new borns (20.9%) and persons with disabilities (18.3%)
  - Lowest portion of people is covered under the categories of workers (0.0%) and workers in case of injury (12.5%)
- Workers are the least protected under the social protection system in the country
  - In fact, workers are least-protected globally (18.6%) compared to other categories of people eligible for different social protection scheme

#### I. Introduction

- Bangladesh's future economic and social development could hardly be matched with current level of social protection particularly related to working age population
  - Bangladesh is in the process of graduating from the LDC group by 2026
  - Bangladesh aspires to become a upper middle income country (minimum threshold level income US\$4096) by 2031
  - Bangladesh set the target to become a high income country (US\$12535) by 2041
  - Rising number of aging population over the years which will accelerate further
- Future economic and social changes will require significant improvement in social issues, most importantly in social protection related issues
  - Establishing institutional structure to provide social protection
  - Ensuring social protection for all stream of people including workers
- Today's presentation will highlight on possible future direction of workers' social protection in Bangladesh

Workers' social protection covers following four areas

- Maternity protection, and paternity and parental leave benefits
- Sickness benefits
- Employment injury protection
- Unemployment protection

#### Maternity protection, and paternity and parental leave benefits

- *Maternity protection* includes income security (through cash benefits), leave policies and effective access to good-quality maternal healthcare for pregnant women and mothers of newborns
- Employment and labour market interventions such as employment protection and non-discrimination, childcare solutions after the woman's return to work and good occupational health and safety measures and breastfeeding facilities at the workplace are important to give adequate protection to pregnant women and new mothers

#### Sickness benefits

- *Sickness benefits* aim at ensuring income security during sickness, quarantine or sickness of a dependent relative
  - Sickness benefits allow recipients to stay at home until they are fully recovered, thereby protecting their own health and, in the case of communicable diseases, the health of others
- *Sickness benefits* contribute to the human rights to health and to social security (ILO 2017)

#### Employment injury protection

 The cost of employment injury benefits and of safety and health at work, including prevention of injury or disease and rehabilitation of injured workers, is part of the overall cost of production and contributes to preventing injured workers, and the families of deceased workers, from falling into poverty

#### Unemployment protection

- Unemployment protection schemes provide income support for involuntarily unemployed or underemployed people and offer employment assistance to support their return to work, in line with international labour standards
- At the macroeconomic level, unemployment protection schemes act as automatic stabilizers, stimulate economic recovery and support structural economic changes
- At the microeconomic level, they improve the matching of skills with available jobs, and provide safeguards against falling into informal work and poverty

- Social protection for older women and men: Pensions and other non-health benefits
  - Pensions for older women and men are the most widespread form of social protection in the world, and a key element in meeting SDG target 1.3.
  - Pension systems are often composed of a mix of contributory and noncontributory schemes aimed at providing income security
  - Pension systems would become a key means by which States can ensure redistribution and overcome various inequities in societies
- In countries with high levels of informality faces difficulties in extending contributory schemes
  - The introduction of tax-financed pensions has allowed the extension of coverage to previously uncovered population groups, especially women

## Linkages between social security for working age and Old age people and other public (social protection) policies

| Needs, capabilities and                |  | Social Security                    | Other public policies                                     |
|--|--|------------------------------------|---|
| deprivation                            | In cash                                    | In kind                            | (social protection)                                       |
| Risks related to employment            | capacity, family                           | cohesion and needless              |   |
| Un(der)-employment                     | Unemployment (insurance) benefits          | Employment guarantee               | Regulatory and other labour market policies; microfinance |
| Sickness, injury, disability and death | Social<br>(insurance)<br>benefits          | Home help; care and rehabilitation | Safety and health at work;<br>labour market integration   |
| Old age                                | Social<br>(insurance)<br>pensions          | Old people's homes; home help      | Savings   |
| Family cohesion                        | Maternity,<br>child and<br>family benefits | Creches; parental leave            | Labour market integration                                 |
| Neediness                              | Tax-financed social benefits               | Social Work                        | Anti-poverty policies                                     |

Source: ILO (2003)

- In FY 2020-21 a total of Tk.
   95,683 crore has been allocated in the revised budget for social safety net programmes. The allocation is 17.75 percent of the budget and 3.10 percent of GDP of the same fiscal year.
- Majority of the programmes are targeted to employment support to different categories of working age population
  - Mainly covered maternity protection, and paternity and parental leave benefits, employment to different marginlaised and disadvantaged groups
  - Support to old-age people
- Some of the key components are missing: employment injury and unemployment benefit

## Allocation Pattern of Social Safety-net Programmes and Social Empowerment

| Programmes                   | FY'20     | FY'21 (Revised) | Change in  |
|------------------------------|-----------|-----------------|------------|
|                              | (Revised) |                 | percentage |
| Various allowances           | 33047.81  | 33191.15        | 0.43       |
| Food Security and            |           |                 |            |

#### 4.1 Social Protection Needed for Unemployed Caused by COVID Pandemic

- Bangladesh has experienced significant number of unemployment during the period of COVID pandemic
- The high level of job loss occurred during the immediate period when the estimated job loss was between 11.1 million to 20.5 million
  - According to that estimates of the a2i, the official agency, the overall job loss was the highest during the immediate pandemic period (March-June, 2020) with a loss of 20 million jobs which would gradually decline in the following periods – 2.8 million in August, 2020, 2.74 million jobs at the end of 2020 and 2.5 million at the end of 2021.
  - The highest amount of job loss would be in the SMEs and informal sector till the end of 2021 this indicates a slower recovery in terms of creating jobs.
  - The a2i, an official agency provided estimates of job loss of 20.2 million based on the discussion with the concerned stakeholders.
- Islam (2020) on the other hand estimated a job loss of 11.1 million during April-May, 2020 based on the LFS 2017

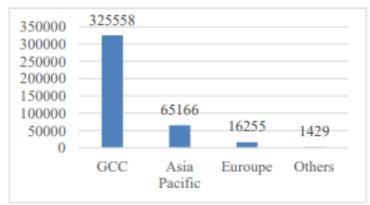

#### 4.1 Social Protection Needed for Unemployed Caused by COVID Pandemic

- Major sectors have experienced disproportionate adverse impact due to the shutdown of economic activities both nationally and globally.
- Based on the level of risks and severity of impact, BILS (2020) has categorised the sectors into three groups (Figure 1)
  - High risk and severity impact sectors such as manufacturing, construction, transport, wholesale and retail trade, food and accommodation services and personal services;
  - Medium-high risk and severity of impact sectors include finance, domestic service, retail estate and education; and
  - Low-risk and severity of impact sectors include agriculture, health, information and communication
- About 69% of the employed population in urban areas were in high-risk states where the economy's share was 49%

- Bangladeshi migrant workers have experienced with significant Job losses during the pandemic period
  - Mainly from the GCC countries
- The coverage of social safetynet for the working age people was limited
  - Mostly in the form of credit-support
- Almost no use of unemployment benefit schemes for workers
  - Except a support for unemployed from the export-oriented sectors
- Majority of workers working in the informal sector (85%) suffered with lack of support

Chart 7: Number of Bangladeshi migrants returnee due to COVID-19 (April - December 2020)

#### 4.2 Issues of Social Protection in view of Graduating from LDC Category

- Bangladesh needs to upgrade its social protection schemes while it will be graduated from the LDC group
  - Different middle-income countries practice different types of social protection including for working age people

#### 4.3 Rising Aged Population

 Aging of a large share of population will be an added concern from the point of view of social protection

#### 4.4 Rising Accidents and Injury in Workplaces

 With the rise in economic activities, industrial accidents and injuries have been rising which need attention from social protection point of view.

#### 5.1 Bridging Solution

- Employment Injury Insurance Scheme (EIS): ILO and GIZ have been working on introduction of EIS in Bangladesh
  - Initiatlly targeting to export-oriented RMG Sector
- The *Bridging Solution* is grounded on the following vision
  - An efficient no-fault and risk-sharing EIS based on the principles and standards of relevant international labour standards (particularly C. 121 and R. 202) lowers production costs and enables harmonious work relations
  - Employers are responsible for providing protection (compensation and medical care) when an employment-related injury occurs
  - A temporary nature but a clear legal basis and the use of existing administrative structures to the extent possible with the view to scaling them up
  - A level of benefits that complies with international standards
- The *Bridging Solution* requires a firm national commitment towards taking over the total amount of recurrent benefit expenditures and administration costs after a maximum of 5 years through contributions based on wages at the enterprise level
  - Employers are entirely part of the implementation of the EIS
  - Time is of the essence

- The expected outcomes of the Bridging Solution are:
  - A legal framework in line with ILS
  - A technical solution for a wage-based contributory mechanism to be used by the employers
- A transparent, accountable and sound governance of the EIS
  - An administrative operational structure in place and able to collect contributions and to deliver benefits to victims of work injuries
  - Reliable and solid data to build efficient administration and propose a sound review of normative and regulatory framework
  - A management information system (MIS) in place
  - Targeted occupational, safety and health (OSH) plans based on the scheme's experience
  - Tailor-made calibration of the contributions and costs based on real experience and reliable data
  - Access to an efficient complaint and appeal mechanism
  - Recommendations to improve compensation and other services practices for RMG in line with ILO C. 121 and as committed in National Tripartite Plan of Action (NTPA)
  - Lessons and recommendations for the scaling up of EIS

#### **5.2 Unemployment Insurance**

- Unemployment benefit needs to be introduced through unemployment or other social insurance scheme.
- To be added based on ILO (2019)

#### **5.3 Universal Pension Scheme**

- National Pension System (NPS) in India is a retirement benefit scheme introduced by the Government of India
  - To facilitate a regular income post retirement to all the subscribers.
  - PFRDA (Pension Fund Regulatory and Development Authority) is the governing body for NPS

#### Salient Features & Benefits of NPS

- National Pension System (NPS) is based on unique Permanent Retirement Account Number (PRAN)
  - This is allotted to every subscriber.
  - In order to encourage savings, the Government of India has made the scheme reassuring from security point of view and has offered some attractive benefits for NPS account holders.

An NPS Account offers the following benefits:

- Regulated: NPS is regulated by PFRDA (Pension fund regulator under Ministry of Finance, Govt. of India.) which ensures transparent norms governing the activities.
   NPS Trust ensures adherence to the guidelines through regular monitoring
- Voluntary: It is a voluntary scheme for all citizens of India. You can invest any amount in your NPS account and at anytime
- **Flexibility**: You have the flexibility to select or change the POP (Point of Presence), investment pattern and fund manager. This ensures that you can optimize returns as per your comfort with various asset class (Equity, Corporate Bonds, Government Securities and Alternate Assets) and fund managers
- **Economical**: NPS is one of the lowest cost investment products available.
- Portability: NPS account or PRAN will remain same irrespective of change in employment, city or state
- **Superannuation Fund transfer**: NPS account holders can transfer their Superannuation funds to their NPS account without any tax implication. (Post approval from relevant authorities)
- Tax Benefits: NPS offers triple tax benefits

## Thank you
